MEMORANDUM FOR THE RECORD

SUBJECT : Revision of Radan Proposal To Be Submitted by
General Precision Laboratories

25X1

25X1

1. As a result of discussions held with following: R. M. Bissell, R. L. Clark and [redacted] it has become apparent that the Project requirement for Radan exceeds the two units requested in previous meetings with GPL. The total figure finally arrived at was six. This assumes a [redacted] requirement of one or two units and two base operation of the Radar aircraft.

2. Therefore GPL was requested via a telephone conversation to alter their proposal to include the following:

- a. Two (2) Radan sets with spares necessary for a flyaway kit and 180 day operation from a single base.
- b. Four (4) Radan sets with a flyaway kit and spares for 180 day operation from two bases.
- c. Two (2) Radan sets without any kit or spares.
- d. Tech-representative services on a per-man-month basis.

3. This proposal should be completed by 22 March 1956.

25X1

4. [redacted] of GPL has been requested to send the Project copies of the Radan cabling diagrams and instrument and control panel installation drawings.
